AI Engineer | Multi-Agent Systems · CrewAI · LangGraph · AutoGen |
Data Engineering Background (IBM DataStage · ETL · SQL) | MS CS
@ CSUDH | Open to Work

Los Angeles Metropolitan Area

Summary

I'm an AI Engineer with a strong data engineering foundation, specializing in building Multi-Agent Systems and Agentic AI Architectures. With nearly 4 years of experience as a DataStage ETL Developer and PL/SQL Developer, I've built and maintained large-scale data pipelines, optimized complex SQL workflows, and delivered production-grade data solutions. That background gives me a unique edge in AI - I understand how data flows, scales, and breaks at the infrastructure level. Now I'm channeling that experience into building intelligent AI agent systems using:→ CrewAI - multi-agent orchestration and role-based agent design→ LangGraph - stateful agent workflows and graph-based reasoning→ AutoGen - meta-agent systems and agent-to-agent communication→ AWS Bedrock - cloud-native AI with short & long-term memory architecture. Currently building an 8-project AI Agent portfolio including a 4-agent trading floor powered by 6 MCP servers and 44 tools - the kind of systems businesses will run on in 2026 and beyond. I'm actively seeking AI Engineer / ML Engineer roles where I can bridge the gap between solid data infrastructure and cutting-edge AI systems. GitHub: github.com/akilanpandiyana Location: Long Beach, California Open to: Full-time AI/ML roles (remote or hybrid) Let's connect if you're building something exciting in the AI space!

Experience

SCAN

Graduate IT Intern (Data Engineer)

June 2025 - December 2025 (7 months)

Long Beach, California, United States

- Designed and automated data pipelines using Azure Data Factory and Microsoft Fabric, reducing manual processing time by 60%

- Integrated Moveworks AI with enterprise data workflows, enabling intelligent automation across IT service management
 - Modeled and transformed healthcare data for analytics and stakeholder reporting use cases
- Built monitoring and alerting for pipeline failures, achieving 99.5% reliability in production

CSUDH College of Continuing and Professional Education

AV/IT Student Assistant

May 2024 - May 2025 (1 year 1 month)

Carson, California, United States

- Managed AV and IT infrastructure for 20+ on-campus events with zero technical disruptions
- Provided tier-1 IT support resolving hardware, software, and network issues for faculty and students

CGI

Software Engineer (ETL Developer)

March 2021 - January 2024 (2 years 11 months)

Chennai, Tamil Nadu, India

- Designed and supported end-to-end ETL pipelines using IBM InfoSphere DataStage and CDC.
- Developed optimized SQL transformations with Teradata SQL Assistant for complex data processing.
- Automated batch scheduling and orchestration, enhancing operational stability and performance.

Oofix Infotech

Software Engineer

March 2020 - March 2021 (1 year 1 month)

Madurai, Tamil Nadu, India

- Developed complex SQL queries, tables, views, and stored procedures to enhance data ingestion workflows.
- Designed and executed ETL processes for Excel-based data, ensuring thorough validation and cleansing.
- Supported production ETL operations through unit testing and troubleshooting SQL-related issues.

Education

California State University-Dominguez Hills

Master's degree, Computer Science · (January 2024 - December 2025)

Anna University

Bachelor of Engineering - BE, Computer Science and Engineering · (June 2016 - September 2020)

Little Flower Higher Secondary School, Kumbakonam, Tamil Nadu

HSC, Computer Science · (June 2014 - April 2016)

Minerva High School, Kadichambadi, Tamil Nadu

SSLC · (June 2012 - April 2014)
